

1470 nm high-power unmounted laser chip

ML1817

OVERVIEW

ML1817 is a high-power multi-mode 1470 nm laser designed for applications requiring high-power free-space laser beams at eye-safe wavelengths. This product is an unmounted chip (bare die), which can be used in CW operation, given that the mounting and packaging can handle the thermal load. Due to the inherent thermal sensitivity of this laser product, proper cooling must be ensured during operation.
