modulight
on your wavelength

Turnkey laser systems ML7700 >

Stand-alone laser systems with fiber output and graphical touch-screen user interface.

Power: 1 - 100 W

Chips and mounted laser products >

Original semiconductor laser chips and bars and mounted devices for professional module manufacturers.

Power: < 100 W (CW)

Modulight products and services

Modulight supports its medical lasers with comprehensive lifecycle support. Customers can participate to the finalization of their system by specifying optional treatment flow optimized for their indication. We provide onsite training and installation as well as naturally annual calibration services to start with.

Executive summary

- Medical laser systems
- Subsystems containing challenging optics & electronics
- Laser modules
- Laser chips
- Semiconductor processed wafers
- Engineering services (optical, semiconductor, electronics & SW)
- Lifecycle support (annual calibrations, training, installation etc.)

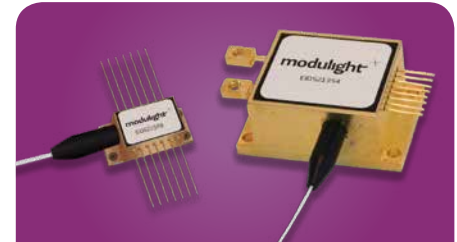

Let us find the best laser for your application!

Laser systems ML6000 series >

Easy-to-use OEM laser systems with exceptional modularity and simple computer control interface.

Power: 0.1 - 30 W

Fiber-coupled laser modules >

Robust fiber coupled laser modules with multiple wavelengths and power ranges.

Power: 0.1 - 35 W
